CAREER SUMMARY & SKILL

Passionate Data & System Analyst with hands-on experience in developing and maintaining RESTful APIs and SOAP web services for EDI and NetSuite integration, ensuring seamless operations. Skilled in building web applications using JavaScript, React, Node.js, and MongoDB. Adept at collaborating with cross-functional teams to gather insights and turn them into effective tech solutions. Strong background in data analysis, having built and optimized databases and data dashboards that provide actionable insights through comprehensive analytics. Enjoys troubleshooting issues and maintaining application uptime and is eager to dive into new projects and grow skills in a collaborative environment.

SKILL: Python, SQL, HTML, CSS, JavaScript, Node.js, MongoDB, EDI, SOAP API, REST API, React, Java, PHP, NetSuite, Linux, Power BI, Google Analytics

WORK EXPERIENCE

Karat by Lollicup INC. DFW, U.S.

Data & System Analyst – RESTful API, SFTP, JavaScript, NetSuite, EDI, Python, Power BI

Aug 2022-Present

- Implemented security measures for data exchange, including AS2 and SFTP protocols, ensuring data protection and compliance.
- Mapped and transformed EDI data fields to NetSuite fields using RESTful API, maintaining data integrity and consistency.
- Conducted rigorous testing and debugging of internal automation platforms, ensuring seamless and error-free data exchange processes.
- Developed highly customized NetSuite workflows, scripts, and configurations tailored to specific departmental needs, optimizing system performance and user experience.
- Utilized Python to clean data and analyze historical and real-time data, built and optimized databases and data dashboards, providing actionable insights through comprehensive analytics.

Wuhan Yuanguang Science & Technology Co., Ltd. Wuhan, China

Data Specialist– Excel, SQL ***Jan 2018-Apr 2019***

- Conducted comprehensive analysis of urban bus route data, meticulously organizing data and text to identify and summarize effective urban optimization strategies for various cities.
- Led a team of three members in implementing optimization models to enhance the quality of public transportation data. Collaborated on the development of an internal system for automatic algorithm optimization, contributing to increased efficiency and accuracy in data processing.
- Developed and maintained sophisticated data models and reports, delivering timely and actionable information to relevant departments. These insights facilitated informed decision-making and improved operational outcomes across the organization.

PROJECT EXPERIENCE

User Management System - Node.js, MongoDB, RESTful APIs, CRUD ***July 2024***

https://github.com/Xiaojing-Lucky/User_management

- Developed a user management website using Node.js and MongoDB, implementing server-side logic and database management.
- Utilized RESTful APIs to perform CRUD operations efficiently.

Photo-Album Using PHP and MySQL – PHP, AWS, HTML, CSS ***Oct 2021***

- Developed a photo-album application where photos were stored on the Apache XAMPP server as files to serve multiple users with separate photo albums.
- Applied PHP Sessions to realize the operation of user's album functions, users can upload a new image, and there is a list with the file names of the images in their albums, when clicking the link, it downloads and displays the image in the image section.
- Deployed the web app into the AWS Elastic Beanstalk and RDS.

Implement a Library Database - MySQL, JAVA ***Apr 2021***

- Designed an EER schema diagram to keep track of members, books, and the borrowing activity of the library. Map the schema to the relation database MySQL schema according to the corresponding requirements of each entity.
- Implemented database update transactions using JDBC via a command-line interface and wrote two triggers to notify renewal and overdue book respectively.

Web Security Lab– FTP, AS2, HTTP ***Nov 2021***

- Exploited the malicious site injects an HTTP GET and POST requests for website Elgg, changing the victim profile using the CSRF attack, and injected JavaScript programs into the same victim's web browser to steal session cookies by exploiting XSS vulnerabilities.
- Launched the SQL injection attack to edit the victim's salary and mastered the techniques (prepared statement) that can help defend against such attacks.

RESEARCH EXPERIENCE

Research Assistant (Professor: Dr. Kathy Lee) ***Mar 2021-Jan 2022***

- Collected, organized, and analyzed data on individuals with dementia and their caregivers by leveraging open-source databases and conducting interviews, providing valuable insights to inform system enhancements and user requirements.
- Collaborated closely with multiple Aging Organizations across the United States to assess and implement technology-driven solutions, such as digital platforms and software applications, that enhance support for individuals with dementia and their caregivers, driving innovative system improvements.
- Utilized Google Analytics and A/B testing to track and analyze user behavior changes on Aging Organizations' websites during the COVID-19 pandemic, providing actionable recommendations to adapt online strategies to evolving circumstances.

EDUCATION

Master of Science in Computer Science *May 2022*

The University of Texas at Arlington, TX, U.S.

Bachelor of Engineering in Software Engineering *Jul 2017*

Minor in Accounting

Xi'an University of Finance and Economics, Xi'an, Shaanxi, China

Academic English Program *May 2020*

The University of Texas at Austin, TX, U.S.
